-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 17-22 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 17-22 not been further treated on the merits.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Susa et al (5,353,757).

Susa et al discloses a heat exchanger (Fig. 17) including at least one row of heat exchange tubes connected to at least one inlet manifold and to at least one outlet manifold (Fig. 18), the tubes forming a heat exchange surface including surface distribution means which can be used to divide the heat exchange surface into a high temperature heat exchange section and a low temperature heat exchange section (5a and 5b), an allocatable heat section (5c) including an allocatable inlet manifold and allocatable outlet manifold that can be allocated to the high temperature heat exchange section or to the low temperature heat exchange section (col. 12, lines 40-57), and switching means

Art Unit: 3744

(23') to connect the allocatable heat exchange surface (5c) to the high temperature section or to the low temperature section (5a and 5b).

4. Claims 4-13, 15, and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The references cited in the Search Report of the PCT have been considered, but will not be listed on any patent resulting from this application because they were not provided on a separate list in compliance with 37 CFR 1.98(a)(1). In order to have the references printed on such resulting patent, a separate listing, preferably on a PTO/SB/08A and 08B form, must be filed within the set period for reply to this Office action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Halsey, Pritchard, Bolmstedt et al, Fukushima et al, Banzhaf et al, Pineo et al, and Muramoto are cited to show adjustable heat exchangers.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 571-272-4790. The examiner can normally be reached on M-F 8:00 - 4:30.

Art Unit: 3744

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
